- 18 Evergreens 2-3 ft., Balled and Burlapped Value \$38.00—Bargain Price \$28.50.

Results of Fall Planting Are Most Gratifying

To Home Beauty Builders and Orchard Planters

+

Why We Recommend Fall Planting

Nursery stock is completely dormant by October 10th when we begin to ship.

Trees and plants set in the Fall become well established before Winter sets in and the warm early April showers start the stock growing long before Spring planting can be done on account of inclement weather. Therefore, stock planted in the Fall will make a much stronger growth and give decidedly better effect.

You have, no doubt, seen certain kinds of shrubs, roses, etc., during the summer which are fresh in your memory. Then again you can better visualize what you want to plant because of being able right now to see the effect of such plantings about you.

Fall is the time to select your stock to plant.

Fall planting of home grounds and orchards has increased tremendously during the past five years.

That our customers may benefit by Fall planting, we are extending the 10% discount to October 25th and 5% discount after October 25th.
